

EasySubli Heat Transfer Vinyl

EasySubli is a print-n-cut HTV from SISER that allows you to decorate using your sublimation printer on all material & color fabrics. EasySubli can be printed directly from your Sawgrass or Epson Sublimation printer or can be pressed & sublimated later.

We recommend waiting up to 2 hrs. after printing for the ink to completely dry PRIOR to cutting & masking. Contour Cut in your CAMEO or CRICUT unit.

**Drying TIP: Use the heat press to help dry the ink from the EasySubli.*

Thickness: 220microns
